

## Acknowledgements

Thanks to Dr. J. Leyland for supervision and guidance throughout this project.

## Appendix

Appendix A: A workflow for the MCDM Analysis of the tidal scenario in ArcGIS Pro showing all data used and created during the process.

\* Euclidian distance: in environments, set processing extent to BC\_Sc\_Bathymetry, apply this to all attempts

\*\* The weightings given in these formulae are subject to change depending on which scenario is chosen

\*\*\* Classify: quantile interval, 10 intervals
